Description :

Prsentation de l'diteurThe classic work on animation principles, now fully updated for the digital age.Revue de presse"Among my favourite books, Timing for Animation (Focal Press), by Harold Whitaker and John Halas ranks high. Originally written in 1981 (and newly revised in 2009) this slim volume presents a thorough analysis of the many kinds of timing issues one encounters in producing a narrative style animated film. Timing on Bar Sheets, Movement and Caricature, Newton's Laws of Motion, Objects Thrown Through the Air, Timing a Slow Action, Timing a Fast Action, Timing to Suggest Weight and Force... these are only a few of the many chapters included. A thoroughly compiled manual, it's an old and current favourite."-- Animation World NetworkPrsentation de l'diteurThe classic work on animation principles, now fully updated for the digital age.
